

ATEARGO<sup>®</sup>  
next

## CENTRAL TO YOUR SUCCESS!

The ATEARGO NEXT ecosystem is the EN50518-certified solution by Urmet ATE for Security Operations Centers.

Thanks to **continuous updates and integrations**, it enables unified management of multiple event types, **without the need for additional software.**

Intrusion detection, video verification, video surveillance, fire detection, and video analytics all converge into **a single interface**, making ATEARGO Next the central hub for all operator activities.

The result is immediate operability, faster response times and complete control over every event flow. ATEARGO Next meets today's and tomorrow's needs: central to your success!

## ATEARGO NEXT:

### The **unified interface** for Security Operations Center management

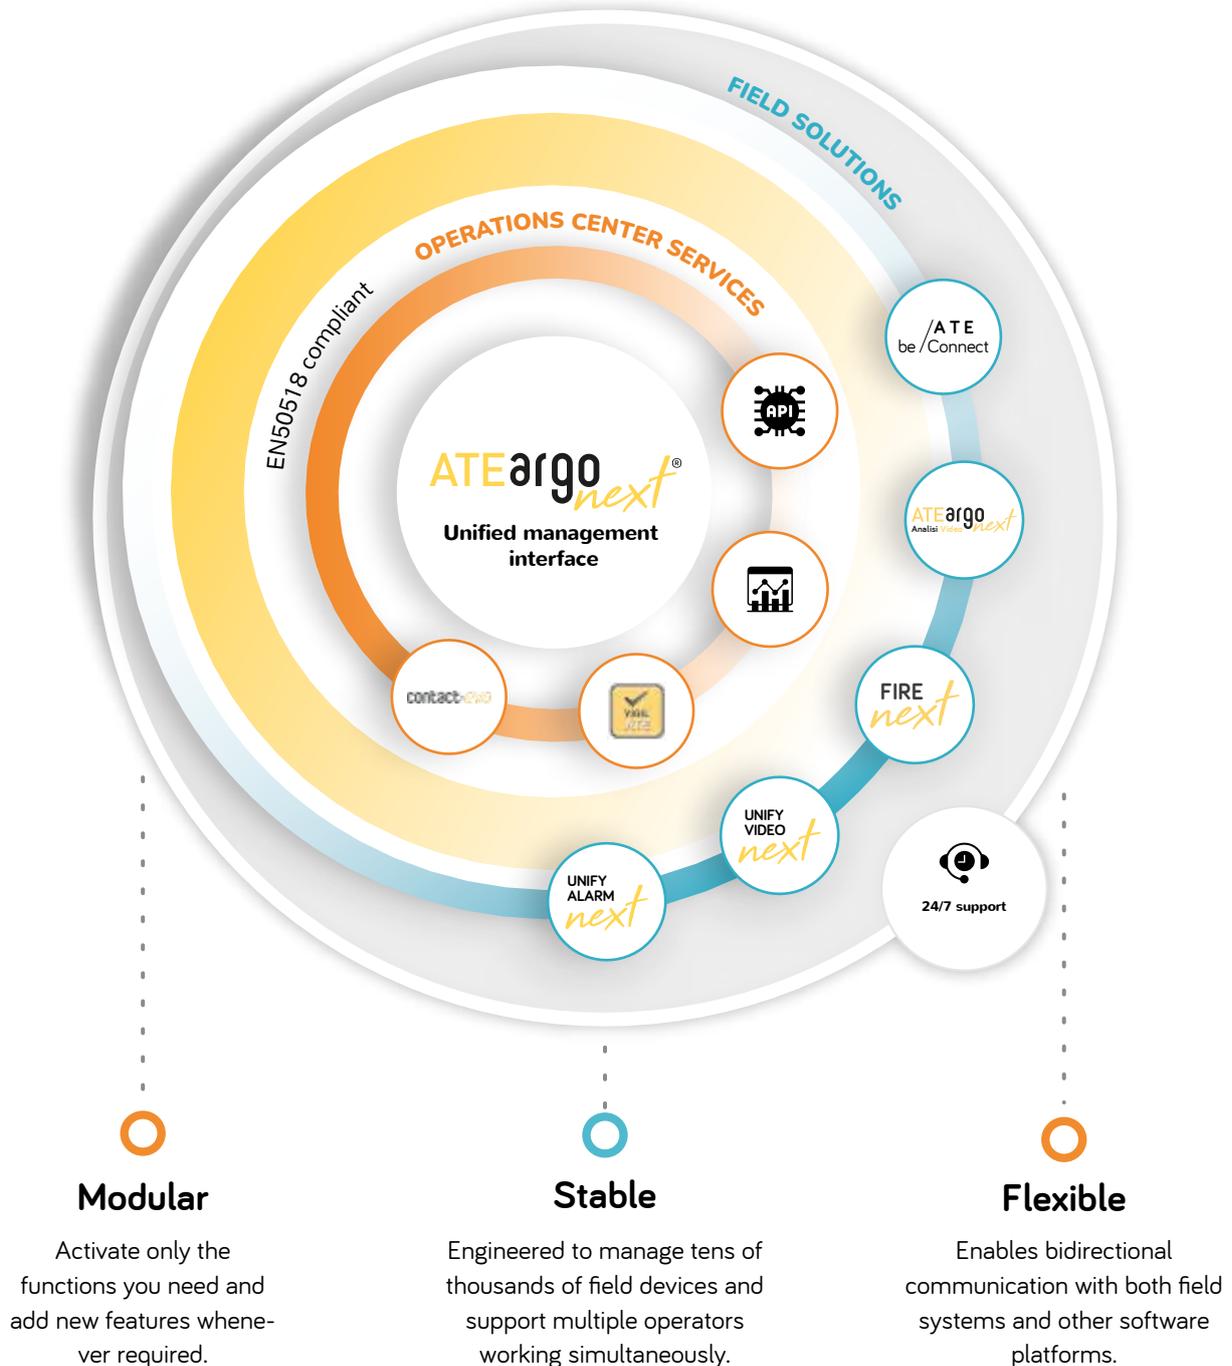

New software, new **multi-platform client-server** architecture, new **user experience!**

ATEARGO Next meets the needs of control room operators with a completely **renewed, modern and intuitive interface** designed to simplify daily operations. Clear, comprehensive and streamlined screens enable fast and efficient alarm management.

A dark background, discreetly colored flags and an innovative grouping feature by client profile support **optimal performance.**

A **wide range of integrations** extends native functions, **ensuring full control over all field events.**

ATEARGONEXT, redefined in its architecture, is set up for Business Continuity Disaster Recovery.

## SYSTEM STRUCTURE

The **ATEARGO Next ecosystem** is the **EN50518**-certified solution by Urmet ATE for Security Operations Centers. The ecosystem consists of **coordinated services** built around the ATEARGO Next event management platform.

The ATEARGO Next ecosystem can be supplied on a **dedicated hardware platform**, specifically designed for maximum reliability and security. It includes customized servers, a virtualization system and a replication and backup system, allowing tailored implementation of **Business continuity, disaster recovery, and replication functions**.

The ATEARGO Next ecosystem is **constantly evolving**, the **best reliable and innovative technologies** are used to keep pace with progress.

UNIFY  
ALARM

UNIFY  
VIDEO  
*next*

Unify modules **manage dozens of video and anti-intrusion protocols**  
A **unique, open, intuitive and EN50518-certified interface.**

Unify Next allows the operations center to completely manage and monitor the installed systems.

### Key benefits

- Simplified management of alarm events and video verification events: **faster response times, fewer errors and optimized control room operations**
- A single platform for **multiple functions**
- An **intuitive interface** that simplifies control room operator training

The functions of Unify Alarm Next are consistent and **available across all integrated brands:**

- Event reception
- Automatic and manual remote commands
- Image display from video verification systems
- Simplified operator actions through automation and standardized procedures

The functions of Unify Video Next are consistent and **available across all integrated brands:**

- Customizable viewing options according to specific needs
- Management of video analytics and cloud connections
- Fast search capabilities for pre- and post-event scenarios
- Access to event history
- On-demand video recording and viewing
- Simplified operator workflows through automation and standardized procedures
- Continuous monitoring of video systems to regularly verify their operation
