

The Integrated Telecare solution

For social service organizations, care providers and service companies

Pendant
remote control

4G terminal

Wrist
remote control

MYOSOS is the new range of **telecare solutions from Urmet ATE**, featuring two models designed to ensure maximum safety in any condition.

MYOSOS is easy to install thanks to a dedicated app for smartphones and tablets.

The product can be managed remotely by the control center through a dedicated dashboard.

The assisted user can send an alarm signal by pressing a button on the

terminal or on the remote control, available in both pendant and wrist versions.

Integration with safety sensors, telemonitoring, and home automation packages completes the solution, providing comprehensive supervision for all common needs.

MYOSOS complies with modern telecommunications network standards, ensuring reliable transmission of emergency calls.

MYOSOS is also compatible with ATE be/Connect, the Urmet ATE solution that provides SIM-based connectivity with multi-operator roaming, transparent costs, web-based management, and dedicated profiles.
